

# Grand Opening Celebration & Business Conference June 8 - 11, 2009

ENECON's International Distributors' Business Conference was held at the prestigious Hyatt Regency Long Island in Hauppauge, NY. June 8 - 11, 2009.

*What an extraordinary week!*

Distributors, Dealers, Sales Agents, Sales Executives and Administrative Staff all came together to celebrate the official Grand Opening of our new Global Headquarters located in Medford, Long Island, NY.

Starting with our welcome reception and dinner on Monday evening, right through our gala farewell celebration which included a show featuring Lenny Dell and the Demensions, the entire week proved to be a truly fantastic experience.

The program also included two days of business meetings, a fun-filled dinner in the Hamptons as well as a dinner cruise down the East River to the Statue of Liberty. There is nothing more awe-inspiring than New York City lit-up at night. Simply breathtaking!

Our thanks to the over 150 people who helped make this an 'event to remember'!

John Balducci, one of ENECON's Founding Directors, offers a 'welcome toast'.

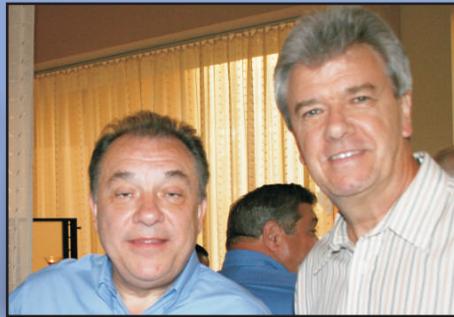

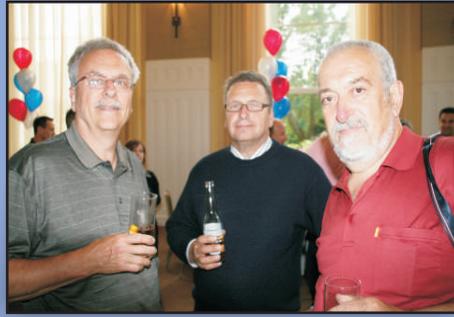

Camille acknowledges Ed, Vivian, Andy & Helen for all their support throughout the years.

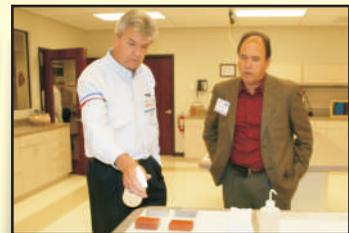

Colleagues from around the world enjoying each other's company.

# Welcome...

# International Business Conference

Ed welcomes everyone by name and offers a greeting to each of our international colleagues in their own languages.

## TEN-YEAR CLUB MEMBERS:

Andy and Ed welcome new members to our exclusive **Ten Year Club**: Susan Marsh-Antonak, Dave Caval, J.W. Kim, John Doughty and Luc Van den Bergh (who could not attend the conference due to a scheduling conflict at a nuclear plant project in Belgium).

Andy Janczak (1990)  
Ed Krensel (1990)  
Mike Tedesco (1990)  
Tony Mantella (1990)  
Helen Janczak (1990)  
Vivian Krensel (1990)  
John Balducci (1990)  
Kazuo Azuma (1990)  
Garry McGehee (1991)  
Bob Barr (1991)

Lauren Otto (1992)  
John Huber (1992)  
Bill Woods (1994)  
John McGehee (1994)  
Andy 'JR' Janczak (1995)  
Chris Tedesco (1995)  
Michael Barr (1995)  
Akbar Khan (1996)  
Matt Goldberg (1996)  
Carl Durham (1995)

Graham Wilson (1996)  
Juan Margarit (1996)  
Brien Neill (1997)  
Bob Kneuer (1997)  
Susan Marsh-Antonak (1998)  
Dave Caval (1999)  
J.W. Kim (1999)  
John Doughty (1999)  
Luc Van den Bergh (1999)

**Graham Wilson wins \$1,000 for the best CeramAlloy CBX application story**

**Ted Griffith wins \$1,000 for the best ENESEAL CR application story.**

**Bob Barr and Ryan Barr (Bob's nephew) win \$1,000 for the best Safety System application story.**

**Ed and Andy present a special Outstanding Achievement plaque to Mady Baruah for his extraordinary performance in helping ENECON develop India and South East Asia.**

**Marco Grande receives his Outstanding Achievement award for his exemplary work in helping ENECON develop Latin America.**

**ENECON NEWS** CH-053

**Spanish Nuclear Power Plant Repairs & Protects Cooling Water Storage Pools with DuraQuartz, DuraFill & CHEMCLAD SC**

These massive concrete storage pools at a major nuclear power station in Spain needed to be repaired and protected.

The plant engineers selected ENECON's high performance repair composites (*DuraQuartz* and *DuraFill*) to repair any damaged concrete and to scribe and prime all the concrete surfaces of the pools, thus insuring a very smooth and crack-free surface.

One coat of **CHEMCLAD SC** was then applied over the entire pool area in order to provide a water-proof and maintenance-free surface.

This prestigious \$1.5 MILLION project, which also included two cooling tower pools and associated channels, was completed on time and within budget by ENECON Iberica to the complete satisfaction of the plant engineers.

**Juan Margarit, President of ENECON Ibérica, provided a very motivational presentation which highlighted numerous large and prestigious ENECON projects that his team has successfully completed in Spain during the last year. Juan was then presented with a special gift from Andy and Ed: a beautiful Breitling watch to commemorate his extraordinary growth and development - becoming the most successful distributor in Europe!**

# New Sales & Marketing tools...

Andy and Mike O'Shea unveiled our new corporate video, *ENECON Worldwide* to rave reviews and cheers from the conference participants. Everyone unanimously agreed that this was the best film that ENECON ever produced and that it will open even greater

business development potential throughout the world.

The successful applications featured in the video came from six of the seven continents and touched on every major product group. It clearly shows the international flavor of

the Company as well as illustrates some very large and prestigious applications that have saved our international

clients millions of dollars over more conventional repair and/or replacement procedures.

## METALCLAD DurAlloy

ENECON Corporation

"Tool-Box" Product - Hundreds of Potential Uses

Bonds to Any Rigid Surface

Machineable and Trowelable

Unlimited Shelf Life

Repair All Types of Machinery and Equipment

WORN SHAFTS, CRACKED CASINGS, SLOPPY KEYWAYS, STRIPPED THREADS, SCORED HYDRAULIC RAMS

Andy and Matt introduced a new Power Point presentation that was developed with the help of Jack Sheets and Sal De Marco, ENECON Sales Directors in the Mid-Atlantic Region.

This professionally produced presentation is designed to be used once our new video is shown. It provides a comprehensive product-by-product review, making it easier for our prospects and clients to understand all that these terrific materials can do for them.

## ENECON's Carbon Fiber Pipe Wrap System is Coming...

Mike and Bill Woods, of ENECON North East, provided an exciting overview of a new pipe wrap system that will be launched soon incorporating specialized carbon fiber cloth to provide superior reinforcement to the entire system. It will also include a thixotropic primer that will not only wet-out the surface but will also fill-in voids and pinholes in the pipe plus a special resin component that will wet-out the carbon fiber cloth and provide

outstanding adhesion and strength to the cloth. The finished system can be left 'as is' or top coated with either CeramAlloy or CHEMCLAD to provide additional environmental protection.

Designed to provide structural reinforcement to deteriorating piping, the ENECON pipe wrap system generated a tremendous amount of excitement from the audience who immediately recognized the

## ENECON NEWS

MT-106

### Major Power Plant Located in the Northeastern U.S. Selects CeramAlloy Pipe Wrap System to Repair this Main Cooling Water Intake Pipe

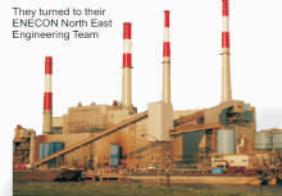

The maintenance engineers at this large oil fired power plant needed an unconventional approach to repairing and reinforcing a damaged section on one of their main cooling water intake pipes.

They could not shut down the plant for an extended replacement procedure and they were concerned that a conventional welding repair could damage the pipe further since it was already worn thin by years of erosion and corrosion attack in the brackish water environment.

They turned to their ENECON North East Engineering Team

who recommended an ENECON Pipe Wrap System to tackle this problem.

After preparing the surface by grinding and wire-brushing, SuperBond was applied to insure optimum adhesion. This was followed by the application of multiple layers of CeramAlloy and special reinforcement cloth to completely encapsulate this pipe section, thus providing a long-term repair. This \$10,000 project took just a couple of days to complete.

exciting business potential for this system.

As our commercial, institutional and industrial infrastructure continue to age, pipe reclamation is

emerging as one of our greatest growth opportunities in the years to come.

# ENESEAL MP

UV Resistant  
Water-Based  
Breathable  
Invisible

**Water-Based Penetrant / Weather Barrier For Masonry, Concrete, Brick & Stone**

UV resistant, breathable penetrant provides unrivaled water repellent properties to most mineral substrates. Environmentally safe. Invisible when dry.

ENESEAL<sup>®</sup> MP is a single component, water-based, ultra-low viscosity weather barrier which dries to a completely invisible, water repellent masonry sealer. It provides extraordinary weather protection to virtually all types of concrete, masonry and mineral surfaces.

ENESEAL<sup>®</sup> MP forms a hydrophobic barrier inside masonry pores that repels water and water-borne salts. This significantly reduces the damaging effects of moisture penetration into concrete and masonry, such as surface scaling, freeze-thaw cracking and corrosion of reinforcing steel.

The invisible barrier forms below masonry surfaces to depths of up to 3/4 inch and, therefore, will not wear away as a result of surface traffic and/or harsh weather conditions. This barrier is also breathable - allowing water vapor to escape from inside the concrete or masonry while dramatically reducing liquid water penetration into the substrate.

Before rain... Invisible protection.	After rain... Unprotected.
Invisible when dry.	Protected with ENESEAL MP.

## ENESEAL MP Introduction...

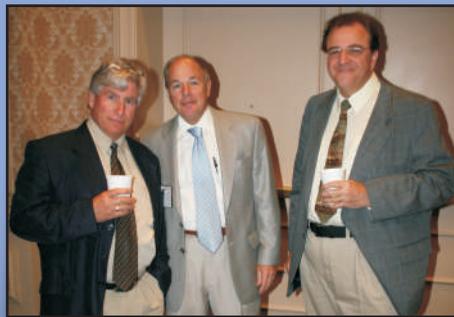

Bob had the pleasure of officially introducing the newest ENECON product to come out of our development laboratory, **ENESEAL MP**.

**ENESEAL MP** is a single component, water-based, ultra-low viscosity weather barrier which dries to a completely invisible, water repellent masonry sealer. It provides extraordinary

weather protection to virtually all types of concrete, masonry and mineral surfaces.

Everyone agreed that this is a product that can provide incredible sales - and income opportunities for everyone in the ENECON Family.
